Yodlee Infotech Pvt Ltd.

2 years

Associate Software Engineer

July 2014 - June 2016 (2 years)

Yodlee Infotech is a product engineering, design and technology services company that helps users in their Finance Management.

Yodlee is a PFM provider where the users can link their financial accounts to our product to see all the assets/liabilities/bills aggregated and consolidated in a single place. This aggregation also collects the users transactions on a regular basis, without the user's intervention.

PFM has some of the great features which make it easier for the users to integrate all the accounts across the institutions. E-mail or SMS alerts, auto categorization of all transactions, financial calendar, bill reminders, auto login are some of the silent features provided by the PFM application.

Roles and Responsibilities:

- Involved in the implementation, coding and utility creation.
- Written PL/SQL to clean up/modify the data for better quality and accuracy.
- Designing and developing the base and utility classes for newly created sites.

Software Engineer

July 2014 - June 2016 (2 years)

To overcome the latency issue in IE browsers, we have new platform for selenium browser. The implementation is in Core Java, JSON, using the Selenium browser based API's.

Total restructuring of our existing platform to shift to Selenium based APIs and reintegration parallel to the existing platform, unit testing and deploying to production then post deployment bug fixing.
